PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate seeking Operations Coordinator, Operations Executive, or Project Coordinator roles in the UAE. Created 10+ SOPs, wrote the requirements for an in house ERP, and coordinated Jira projects for an six member embedded and AI engineering team during a six month operations internship. Brings structured process ownership together with a technical understanding of the products being built.

SKILLS

Operations & Coordination: SOP Development | Workflow Design | Project Coordination (Jira) | Process Documentation | BOM Preparation | Cross-Functional Coordination

Business Systems: ERP Requirements & Testing | MS Office | Canva

Technical: MATLAB | Python | Embedded Systems (STM32, ESP) | COMSOL | PCB Manufacturing (SMT & THT)

Content: Social Media Content Planning | iPhone Videography | CapCut

EXPERIENCE

Operations Management Intern | Tensorbot Innovations Pvt. Ltd., Trivandrum, India **Jan 2026 - Jul 2026**

- Developed and standardised 10+ SOPs, including employee onboarding, intern onboarding and project management, giving staff and teams a clear step by step process from onboarding to project assignment and execution.
- Researched and wrote the requirements and workflow document for an in house ERP covering HR (employee records, leave), inventory (component stock levels and updates) and project management (task assignment and status tracking); reviewed builds with the development team at each stage and requested changes before rollout.
- Coordinated project delivery in Jira for 6 engineers across embedded (4) and AI (2) projects: assigned time bound tasks, tracked progress against deadlines, and verified that results and documents were uploaded.
- Prepared 10+ Bills of Materials across hardware projects, driving component purchasing and inventory replenishment.
- Planned and managed social media content: briefed UI/UX designers, published finished creatives, built weekly calendars of 7 posts (2 carousels, 2 videos, 3 image posts on AI tools and hardware components), and shot short videos showcasing the company's work culture.

Technical Intern | Hindustan Aeronautics Limited – Flight Test Centre, Bangalore, India **Oct 2025 - Nov 2025**

- Completed a mentor led training programme covering signals and systems and digital signal processing, with daily question and review sessions and demonstrations of how these methods are applied in flight test operations.
- Carried out signal analysis assignments in MATLAB and interpreted the results.

Manufacturing Intern | SFO Technologies Pvt. Ltd., Kochi, India **Jun 2025 - Jul 2025**

- Studied end to end PCB manufacturing workflows covering Through Hole Technology (THT) and Surface Mount Technology (SMT) processes in an industrial production setting.

Freelance Videographer & Photographer | Self Employed **Nov 2022 - Present**

- Produced 20+ event and promotional videos for clients, shot on iPhone and edited in CapCut, for Instagram and other social media.

PROJECTS

- **MOS Based Microgas Sensor for Biomedical Applications:** Designed a Pd-ZnO sensor for sub-100 ppm methane detection in breath analysis, using spray pyrolysis, drop casting and annealing with a COMSOL simulated heater design.
- **Head Movement Controlled Wheelchair:** Built a hands free control system (STM32 + ESP-based motion sensor) that converts head movements into wireless directional commands, validated on a functional RC car prototype.

EDUCATION

B.Tech, Electronics and Communication Engineering **2022 - 2026**

Christ College of Engineering, Thrissur | CGPA: 7.2

Class XII, Kerala Higher Secondary Education **2021 - 2022**

CHSS, Chendrapinni, Thrissur | 92.25%

ACHIEVEMENTS & LEADERSHIP

- First Prize, State Level Hardware Hackathon using Vega Processor, Sahrdaya College of Engineering, Kodakara.
- Third Prize, Line Following Robot Competition, Jyothi College of Engineering, Cheruthuruthi.
- Media Head, NSS Unit, Christ College of Engineering: led event documentation, visual content creation and communications.
- University Coordinator, Natural Resource Protection Force (NRPF), Christ College of Engineering: managed student engagement programmes.
